Objective

A graduate with a passion for backend web development seeking an entry-level position to apply knowledge in back-end technologies. Committed to learning and contributing to web development projects with a focus on providing efficient data support and functionality in a collaborative environment. Open to further enhancing front-end skills to complement backend expertise.

Education

Polytechnic University of the Philippines - San Pedro Campus

Bachelor of Science in Information Technology

October 2023

Soft Skills

- Able to communicate and work well with team members.
- Strong problem-solving skills, approaching challenges with a logical mindset to find effective solutions.
- Team player with a cooperative attitude, enhancing the overall efficiency of collaborative projects.
- Capable of managing time and prioritizing tasks to meet project deadlines.

Technical Skills

- **Web Development** (HTML, CSS, Bootstrap, JavaScript, Vue.JS, Nuxt.JS, PHP, Laravel, MVC, OOP, Git, MySQL, Ajax, Axios)
- **Software Tools** (Visual Studio Code, XAMPP, MySQL Workbench, Postman)

Experience

Capstone Project - School Information System (SIS) for Pre-school and Grade School Department of Colegio De San Pedro

Aspiring Backend Developer

- Actively contributed to the development of the backend for a School Information System capstone project.
- Successfully created a comprehensive system, which included QR code-based attendance tracking, a PHP-driven grading system, and simplified PDF report generation.
- Integrated email notifications for student attendance and concerns, enhancing communication within the system.

QPAX Traffic Systems Inc. (Makati, Manila)

Internship, Web Development

- Collaborated with the team to implement the front-end interface using Vue.js with Nuxt.js and Bootstrap, ensuring a user-friendly experience and responsive design by providing the necessary backend data support.
- Developed the backend functionality using Laravel, enabling seamless data management and user authentication.
- Integrated Axios to handle RESTful API calls to fetch updates between the frontend and backend.
- Implemented a robust MySQL database schema to store and manage asset information efficiently.
